DETAILED ACTION

Response to Amendment

- The previous 103 rejections of claims 1-7 and 9-20 over Liu et al. in view of Warzelhan et al. have been **maintained**.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1-7 and 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liu et al. (2003/0092793) in view of Warzelhan et al. (US 6,018,004) listed on IDS

Disclosure of Liu et al. and Warzelhan et al. are adequately set forth in ¶3 of the last action and are incorporated herein by reference.

Response to Arguments

The argument for allowance of amended claims has been fully considered but not persuasive.

The applicant has argued the features of biodegradable polyester mixture (Pg.2, ¶4-6, Pg.3, ¶2). As set forth in the last action, both Liu et al. and Warzelhan et al. disclose polyester biodegradable resin composition, and the suggested combination of

Art Unit: 1796

Liu et al. and Warzelhan et al. would result in a biodegradable polyester mixture the same/similar to applicants', and hence would inherently contain all of applicants' disclosed (not claimed) benefits.

The applicant has argued the limitations of glycidyl acrylate, etc. (Pg.3, ¶1). The examiner would notify these limitations of amended claims filed in RCE have been changed to "compound as component iii that comprises two or more epoxy groups in the molecules". The cited references meet the claims. Liu et al. discloses a biodegradable resin composition for producing agricultural films ([0046]) comprising (by calculation) 20-64% of thermoplastic resin such as polyester ([0070]), 36-80% of starch, and 0.6-12% of degradation promoter such as epoxidized soybean oil ([0070]) with more than two epoxide groups having the following structure (claim 1):

As set forth in the previous action, the deficiency of Liu et al. has been addressed and alleviated by Warzelhan et al. One of ordinary skill in the art would have combined Liu et al. and Warzelhan et al. to form the claimed invention.

Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1796

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
